DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 23-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gallo et al (U.S. Pat. # 5,113,554).

With regard to claims 23-28, Gallo et al discloses a one-piece flexible clip (figs. 1-2) comprising an upper portion (40) that is capable to be flex between a stable convex open position and a stable concave closed position, a lower portion (16) with a plurality of planar teeth (18, 20) extending parallel to the length of the upper portion, the lower portion being integrally connected to the upper portion (figs. 1-2), the lower portion being at least as long as the upper portion (see fig. 1) and the lower portion extending laterally beyond the periphery of the upper portion (figs. 1-2), the plurality of planner teeth in the lower portion inherently forming a comb configuration and a plurality of protuberances (30, fig. 1) formed on an interior side of the upper portion for enhancing the gripping properties. Gallo et al further shows the lower portion hingedly connected to the upper portion (at 32).Gallo et al fails to show the material of the upper and lower portions being made of spring steel material, however, it would have been obvious to one having an ordinary skill in the art at the time the invention was made to construct

Application/Control Number: 10/721,672 Page 3

Art Unit: 3732

the upper and lower portions with the spring steel material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416. Applicant is noted that the clip of Gallo et al is capable of functioning as claimed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Scheemaeker is cited to show the state of the art with respect to a spring clip.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robyn Doan whose telephone number is (571) 272-4711. The examiner can normally be reached on Mon-Fri 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cris Rodriguez can be reached on (571) 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
